CARE AND FEEDING

Your bulls may be wintered at Diamond M Cattle Company at no cost until April 1. We ask that your bulls be picked up before that time.

RETAINED INTEREST

DMCC will be retaining 1/3 semen revenue sharing interest on every bull selling unless otherwise declared. Full possession and salvage value belong to the purchaser unless otherwise stated.

TERMS & CONDITIONS

Cattle will sell under the standard terms and conditions of the American Simmental Association.

All bulls will be semen tested by Dr. Tom Taul, KABSU.

Announcements from the block take precedence over the sale catalog.

DATA UPDATE

♦ Bulls will be semen tested by Dr. Tom Taul, KABSU.

♦ Scrotal measurements available March 8.

IMPORTANT UPDATES:

Facebook: Diamond M Cattle Company Website: diamondmcattle.com UPDATES Available March 8

Welcome to our 2nd Annual Bull Sale,

Bringing you high quality cattle at a realistic value that you can afford to build on.

We would like to extend a tremendous thank you to last year's added customers and to those who have purchased bulls from us in previous years! We love hearing your stories all year and knowing the positive impact of the "DMCC" bull. All bulls in this sale were raised and fed right here at Diamond M. We are around the bulls every day. That allows us to evaluate them carefully as we approach spring sale season.

Good bulls come from good cows. This cowherd raises BOTH bulls and females. **That is a power cow.**

We want you to see the total program at DMCC and invite you to take a look at our fall Female Sale as well. Our two annual sales are made up of one breeder, DMCC - that choice best describes the true potential of a program.

Bulls available for preview anytime from now 'til sale day. March 16th, 6pm.

Best wishes for a happy, successful 2022 in the cow business!

Mark Mueller Matt Mueller

If I am being honest, I have stewed over this footnote for the better part of a month. Not knowing the best way to describe one of the best sires to ever come from Diamond M. And as I type, I will tell you that I am still not sure how to describe future greatness. But what I will say is that Diamond M stands by one philosophy in particular when it comes to breeding. "Breed cattle the way you like them." This is more than trait selection. This is more than "new, popular genetics". This is about sustainability, about longevity, and honestly about legacy. Sometimes it feels that the industry can forget those important things, as dollar figures come into play, and as hardships arise. Sometimes our direction takes a different path. But I ask you, stay the course and trust your instincts. And I believe that will make you the best stockman, you can be. Here is a bull raised by stockman, for the stockman.

With a current weight of 1540, Stockman exhibits a real and valuable performance that cannot be denied. When you pair that up with his intriguing phenotype, incredible mass and graceful movement, there is no doubt that DMCC Stockman will be amongst the greats.

STOCKMAN IS A MUST SEE BULL OF 2022.

The most mature bull in the sale and rightfully so, is DMCC Churchill. The soon to be two-year-old bull is having a projected sale day weight of over 1750 lbs. A Mack truck, with a baldy face! But don't let that size deter your interest. This bull has a load of built-in calving credibility. First of all, he was out of a first calf heifer, who calved just a few days before she sold, and was unassisted. The next thing to note is he is out of DMCC Reload, who resides in Texas at Bird Cattle Company. Many of you may not remember this bull, but he may have been the best brother to sell of the Lock N Load X Black Blaze III 3U offspring. Yes, that would include DMCC Fully Loaded, who's calving credentials have been commended quite often. So, if calving ease, adding pounds, and adding quality bloodlines to your herd interests you, I suggest to give DMCC Churchill the nod.

The only other DMCC Reload sire in the sale comes to you in lot 3. He comes with all of the calving ease from the top side of his pedigree, as I mentioned with lot 2. Paired with quite the stellar cow families on the bottom side. DMCC Counter Attack females are finding their way to the top in multiple programs across the country and it is easy to see why. Tons of milk and performance of udder's, but cattle that also keep the soundness and softness that today's industry so desperately craves. Oh, and don't forget the WLE MISSY U409 female that he traces back to. Take a second and check out that female's registered progeny sometime! One of the few purebreds offered, and one special opportunity at some unbelievable genetics.

LOTS 4 & 5

Maybe one of the more underrated and under-utilized bulls in the industry has been KRMS Primary Candidate. The Triple Crown winning bull from a few years back is still proving worth in pedigrees inside and out of the show ring. If you are unfamiliar with the sire still, you may have had the chance to study some of the well-balanced females exhibited by Prestige Cattle Company recently. Both lot's 4 and 5 exhibit the same qualities that those animals possessed.

LOTS 6, 7 & 8

You may recall a female from our 2017 female sale by the name of DMCC Eclipse 4E. She was and still is one of the most incredible females that we have had the pleasure not only raising but working with to date. A premier donor. As she has matured in Montana, she has started what appears to be a treasured legacy. This past fall, with Robert's cattle, Eclipse more than doubled her initial sale value at time of purchase with the first progeny sold, in what is to become one of the premiere sales not only in the northwest, but in the country. Here are three full brothers by Broker that may not appear to be equal in look, but I can promise you they are equal in terms of quality. Each have a tremendous scrotal development, and structural width. Tons of hair to go with that striking profile view. Not to mention that they are full sibs to RCC Broken Treaty and RCC Make-Up Face who have been successfully exhibited all winter.

In the previous lots, I spoke about the unprecedented mark that DMCC Eclipse 4E is having on Robert's Cattle. What we pride ourselves on at Diamond M is consistency. What more proof do you need than 5T? Here is one of the few 5T son's maybe in existence and a full sibling to Eclipse, the mother of lots 6-8. Another Sky High son that is sure to do what the rest of his lineage has done, and that's preform.

I have spoken quite highly of the B429 female in recent sales, and how she has crept her way up the donor leaderboard, so to speak, at DMCC. Time and again with progeny coming to the forefront of the sale offering. This is the first bull calves out of DMCC Hitman, and we lead off the group with one of the best all year. Quiet in disposition, but loud in terms of quality and substance. The right size to use on heifers, and to mate with older females a like.

An under rated female at the ranch has been Card 37C. A constant producer of both females and sires every year. From the DMCC Honey Badger bull, a half-brother to lot 11 (pictured), to DMCC 46E who is in production at Diamond M, she never skips a beat. If you are wanting to add some pounds, structural soundness, width and dimension, while keeping a soft and sound package, I suggest you take a second to study this Uproar grandson.

We feel that DMCC Hitman has accomplished what we set out for him to do. He has added an eye appeal and structural integrity to some older fashioned Simmental cattle, as well as adding power and substance to the more angular and flat made percentage females we have tried him all. All in all, the consistency remains as solid as his cow family. DMCC Annabelle 3A, who ZWT ranch just purchased a flush on in the '21 fall female sale for \$17,000, as well as the Queen Miles T5 female, who is an up-and-coming donor, both grace this bull's pedigree.

Just an incredibly striking offering here in lot 13, keeping with the Hitman theme. A bull that demonstrates and retains some of his sire's qualities. Youthfulness being one. An athletic example of the functionality of Hitman sired cattle. Longevity in terms of skeletal make, soundness, and usefulness. This bull screams "heifer bull"! But don't be afraid to use him to help lengthen out and sharpen up some course made females.

*Good bulls come

LOTS 14 & 15

With DMCC Hitman being a relatively new sire to the market, semen offered at ST Genetics, it is important to note the consistency in which he is producing quality cattle. Keep in mind we only run around 120 spring calving cows, 50 falls, and put in around 30 embryos at a co-op herd. This sire is working across the board from purebred cattle to percentage cattle. Showing the power of his pedigree, and exhibiting a new, fresh, powerful style and look. The consistency you are witnessing is not a fluke. Further evidence being in the fall female sale offering.

Maybe a lesser-known bull is Natural Law, but soon to be household name. He was used on the DMCC 58F Francesca donor, residing north of Billings. If you recall, she was a Reserve Division winner at the National Western a short time ago. Further research would have you notice that she is also a descendant of the 307B donor, mentioned in the previous lot. Love the length of body, and neck, with a smooth shoulder that explodes with shape behind it. Another example of a stellar cow family.

Many passersby will remember the elegant, bred female lot 35 from the fall sale. Tragically we lost the beauty just weeks before the big day. But big brother is ready to carry on the family legacy and incorporate it into your herd. A bigger framed bull, that is ready to add a touch of size to some more moderate cattle. And being that he is stronger aged, he is ready to handle perhaps a larger task.

The Secret Weapon X Card Snapchat is no stranger to success. Notably used at Cardinal Cattle company, Secret Weapon has been bred to some incredible bred females sold by Cardinal and widely accepted and hailed as one of the easiest calving, and docile bull matings. If you are wanting to integrate possibly some more length of your cattle's front 1/3 or body, this might be a good place to start.

Quite possibly the best SimAngus cross that we have run across in the last dozen years has been Secret Weapon X well honestly anything with an Angus pedigree. Adding bone quality, length of body and front, while keeping a soft look, and easy-going nature. We have several in production here at the Diamond, and have had several successful customers, that have purchased these females with this sire as the guiding force. More proof of this sire's dominance could be seen at the G- sale this winter, where you found several high selling females, tracing back to the bull. We feel that these new sires, will follow right in daddy's footsteps.

As, I boast about the Secret Weapon success, I would be ashamed if I didn't mention lot 22's full sister, we have come to know her as "Star". Simply put she is one of the SW females that has shown the brightest. And this full sib has the makings to be equally as dominant. A ¾ blood out of the timeless SS Temptress 042U donor, that again comes up in a pedigree. She has produced countless sale attractions over the years and even at her age, continues to flush like a dream. We are anxious to see the calves this one will sire

A lot to like about DMCC High Power. Initial response will be astonished at the front end this bull possesses. But I ask you to also notice his length of spine and muscle pattern as well. All of which he exhibits in a unique fashion. Go even further in depth and see that his dam is a full sib to the dam of lots 6-8. And further yet, you will come to realize that this bull is similarly bred as the National Champion DMCC Destiny 22D, a High Regard X 5T. A lot of bull with a lot of pedigree.

Hard to discredit the impact that High Regard has had in our herd. From the DMCC Destiny 22D, a genetic full sibling to the lot 29 bull, to the 3A daughter by him stationed in Florida at Lightning K Cattle Company, we sure do appreciate everything he has brought to the table. We even ran a High Regard son on our heifers in 2020, DMCC Sentinel. Cattle that are well balanced with a ton of foot, bone, and ruggedness.

If you have had a chance to tour the facilities here at Diamond M, there is no doubt that you have come across one of the most prolific herd sires we have running, DMCC Capone. He has produced the likes of sale topping bred, from our 2021 winter bred sale, to other current herd sires running the pastures in northeast Kansas such as DMCC Stonewall. A rugged, powerhouse of a bull that everyone asks about, and are taken back when they learn he is a full brother to Loaded Up as well as Fully Loaded. There is no question that he is their equal and possibly superior in some aspects. Lot 30's dam is also one of our top producing Angus females on the ranch. This half-blood sire is sure to fall right in line with the consistency in this bloodline.

In a previous footnote from the female sale, I mentioned that, sometimes we let our minds get in the way of our eyes. Sometimes we just need to dumb it down and breed good cattle to good cattle and get back to the basics. Lot 33 is an example of that. One of

FULL SIB

the first DMCC Hiawatha calves we have had out of the DMCC Destiny 22D female, who won Fort Worth and was Reserve Champion Purebred at the NWSS. That's 5T and 3A in one pedigree. Hard to argue the logic. And even harder to argue against this one's phenotype.

One of the strongest bloodlines over in the past few sales has been that of the Secret Weapon X 216Y Frog Steel Force Female. Heifers that have seen new surroundings that have stretched from Montana with Wade Leachman, to Cardinal Cattle company. Lucky for us Justin Johnson with Prestige Cattle Company also has a full sister, who has been a healthy producer for him and his family.

UG MISS TARA 4161B ET

Recently selling many calves out of her. We were fortunate to be partners with him on this stunning purebred sire. A strong aged, solid black bull with a ton of muscle shape and pattern, with above average testicular development.

As I stated about High Regard, Pays to Believe has had equal if not more impact on our program as any outside A.I. sire. We currently run DMCC Hitman, as well as a full brother to the lot 41 bull that we call DMCC Dark Horse. The first calves from him will be available this fall. You can never go wrong with complimenting your program with Black Blaze II 5T progeny, and if we don't miss our guess, this young sire will be just as awesome as the rest.

LOTS 42 & 43

A sire group that may be as popular as any, and especially in the southern states, has been that of DMCC Counter Attack, current herd sire at Bird Cattle Company. Breeders love how sound and functional the progeny are, as well as the smoothness of shoulder and easy fleshing nature. Few sires have been promoted out of him. Now whether that be due to semen sexing technology, or just dumb luck, the fact remains that he can throw both male and female bovine quality equally. We love some of the more angular attributes of these cattle as well as their quality and consistency of bone.

If you are like us sometimes you can feel exhausted with trying to find the new A.I. sire to use. When we get to that point, a lot of times, we will use an old sire. Ever hear the phrase "dance with the girl you brought"? Well, we like to remember our roots and keep a dose of old school in our breeding program. Hence, lot 46. 3C Macho cattle have been at the forefront of this program, since we have bred Simmentals (5T, 3U, etc.). And Macho X Angus females are one of the best SimAngus crosses we have found. Here is another example of said cross breeding, but this time the male version.

For those of you who have been following our program since even before we started having production sales again in '15, you may remember a bull that ran as our herd sire by the name of DMCC Zeus. Yes, we still have a couple full sib embryos in the tank to the popular Macho son, and here are two. Zeus produced some of the best females ever to come out of DMCC. Many are still in production. We also ran a full brother to him ourselves, this past summer, to clean up on our bred heifers for the fall sale. They are excellent in terms of their feet, legs, and belly swoop. We believe these bulls will be every bit as good and well balanced as their predecessor.

A lot has been said about the Secret Weapon sire group, and the bulls and females that have come out of it as well. One mating that has seemed to work as well as any has been Lock n Load X Secret Weapon. We decided not to ruin a good thing and followed our own trend. A rugged bull that has his work clothes on. One that is going to produce ground pounding donor cows and future sires. Love his strong topline, substance of bone, and levelness of hip. Also, a full brother to the lot 24 baldy female from the 2020 female sale that turned heads all year long.

LOTS 51 & 52

DMCC Black Velvet had been making some noise leading up to this fall's sale, but once people laid eyes on the breds and opens out of him this year at the 2021 female sale, they became believers in just how good of a sire he really is. Many would say that they were the best sire group at the Diamond in November. These bulls are no exception. A couple stronger aged bulls to do some of the heavy lifting in lots 52, and 53. And if a heifer bull is what you so desire, I think that you would find that lot 51 would be a good place to start.

The Maine Anjou breed has been very near and dear to the hearts of everyone involved at Diamond M. Matt's first cow was a Cunia. Mark developed a reputation for having some of the most elite genetics in the breed. The stories are countless, and if you have gone down that path with Mark, you probably are aware! But one thing remains the same, the love of the Maine Anjou breed. And we still pride ourselves on providing exceptional quality Maine stock. The DMCC Game Changer bull is proving that to still be the case. A Musgrave Sky High out of BOE Garth's full sister, in his first calf crop, he has produced the high seller in our '21 female sale and now this unbelievable set of Maine/Angus bulls. No better way than to start off with DMCC Join Me. A bull that not only traces back to a Cowan's Ali son, but goes back to DMCC Polleroid and Hillview Goldette. Some of the best Maine genetics ever to grace the grounds at the Diamond. The bull Polleroid look familiar? That is because he is the sire of DMCC Winnie 43W that you may have seen pop up in several pedigrees in the Maine breed in recent years.

LOTS 57 & 58

Now and again you will see us dive a little bit out of our comfort zone. We had seen a few Ain't Bluffin calves and thought that he might make some of our old school Maine's a little flashier. And boy did he ever! Two moderate made future sires that have a lot of upside. Whether that be for breeding Maintainers, club calves, or the commercial calf, the versatility seems to be limitless with these two. They are excellent on their feet and legs, and huge footed. The lot 57 is a half sib to DMCC Game Changer, and the lot 58 bull goes back to, you guessed it, DMCC Perfect Angel 36E. Here are two bulls that might not normally be considered maternal, but with genotypes such as this, they should more than exceed expectations.

One of the last Maine heifers that we followed was DMCC Trish 68Z. Famously exhibited by Cardinal Cattle Company some time ago. The Lifeline granddaughter was exquisite to say the least. We were fortunate to purchase one of the only daughters to come out of her to date. And so have it, her first calf came to us in DMCC Judgement Day. A Bush's Wingman son that displays more muscle shape than his 1/4 blood pedigree would suggest.

The Angus breed is as popular as ever, and for us, as useful as ever. We utilize the Angus breed to supplement our Simmentals and Maines alike with more phenotype characteristics than perhaps genotypes and statistics. One such bull that fits our criteria is Bush's Wingman. While providing a stout look, he also provides a lot of soundness and strong structural characteristics that we find desirable. As you can see, he not only works when cross breeding, but he works just as well on the Purebred side.
